

Lancaster Tutoring Centre is run by Danny Garratt who also owns Preston Tuition Centre, having qualified as a teacher in 2012. This means that we can also offer additional services to the Maths, English and Primary already used by many in Lancaster; these include:

Science

Just as popular as Maths and English in Preston, this is available to everybody in Lancaster as an online option. Sessions are taken by a qualified Science teacher who has a biology-related Masters to his name, and are usually 1-2-1 or 1-2-2 when using breakout rooms.

Homeschooling/Alternative Provision

Preston Tuition Centre offers support for homeschooled children aged 5-18, providing structured teaching sessions, tailored learning plans and exam preparation.

Homeschooled children can benefit from in-centre tuition, which offers a structured learning environment and potentially some social interaction.

We offer in-centre sessions for Maths, English and Science during weekdays, with daytime and after school sessions available. We also offer online sessions as detailed below.

In-centre sessions usually run for an hour, however, we can tailor this to the requirements of your child; our daytime offerings are often for two hours for example.

Other Online Options

Although we love our in-person sessions we also recognise that an online option can be preferable to accommodate tuition around work commitments and after school activities. This is why we offer online options for these subjects: Sciences, Religious Studies, History, Computer Science, Languages, Business Studies and Economics.

If you, or anyone you know, may benefit from any of Preston Tuition Centre's offerings then please contact us via email at prestontuitioncentre@gmail.com or phone 01772 962162
